Title: Cooking helper

Description: A website with tons of cooking recipes help people to cook well. Users can upload their own ways of cooking or view others recipe to cook something tasty.

Actors: Users (contain cooks, housewife, people who likes cooking)

Functionally:

1. Users can sign up
2. Users can view cooking recipes provided by website
3. Users can post their own cooking recipes
4. Users can view others cooking recipes
5. Users can like, comment, or add the recipes to their favorite
6. Users can record their cooking recipes
7. Users can record how many times they have done the recipe
8. Users can see how many people view the recipe, or how many people have made the recipe, and how many times the recipe is made
9. Users can record their cooking process in details
10. Users can record their cooking process with different time, different amount of spice, having the comparing chart
11. Users can write their own comment on how the recipe is
12. Users can write how they can improve the recipe for future tries

Stretch Functionally:

1. Better UI for cooking process: step by step (every step in one page), timer and alarm for timing if needed during the process
2. Users can upload photos for the results, or the video for the process
